5 Assembly Procedure

I Complete Wiring Assembly

Important Notice:The connectors of the wiring terminals must be aligned, as shown in the figure on the right.

Electrical Wiring Overview:

Specific Wiring Diagram:

Brake taillight: Red connector, 2-pin, no left/right distinction.

Twist throttle: Black connector, 6-pin.

Front headlight: Yellow connector, 3-pin.

Display: Purple connector, 7-pin.

Control buttons: Black connector, 6-pin.

Brake: Red connector, 2-pin.

Left & right turn signals: Red connector, 2-pin, left and right are distinguished.

Wiring Completed Diagram:

II Full Bike Assembly

A. Installed the handlebar

Use an Allen key to loosen the handlebar clamp bolts.

After adjusting the handlebar angle and left - right position, tighten the four clamp bolts securely.

B. Installed the display

Place the display bracket onto the sleeve, then insert the bolts through the bracket holes and the sleeve.

Use an Allen key to tighten the bolts.

C. Installed the front fender

There are a total of three bolts in this step—use the correctly sized Allen key to tighten all of them.

D. Assemble the Front Brake Caliper

Note: This step must be completed before installing the front wheel. The brake caliper has two pin holes. Align them with the corresponding positions, insert the pins, and tighten the bolts.

E. Installed the front wheel

Insert the brake disc of the wheel into the caliper pistons.

Secure the corresponding sleeve, insert the wheel axle, then use an open-end wrench to tighten the axle nut.

F. Installed the rear shock

Use an open-end wrench to loosen the rear shock mounting bolt.

Insert the bolt through the rear shock eyelet, then use an open-end wrench to tighten the nut.

G.Installed the front plate

Place the number plate onto the sleeve, insert the bolt through the number plate and the sleeve

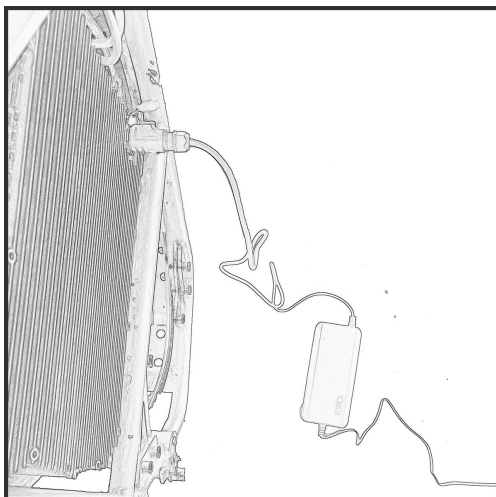

and tighten it with an Allen key.

6 Charging Steps

Open the rubber cover of the charging port and insert the charging plug.

When the charger indicator light turns red, charging is in progress.

When the indicator light turns green, the battery is fully charged.

7 Safety Instructions

1. Follow all local traffic laws and regulations while riding.
2. Always wear a safety helmet and ride responsibly.
3. Before riding, check and ensure that all fasteners are tight and no parts are damaged.
4. If the motorcycle makes any unusual noise or alarm sound, stop riding immediately.
5. Charge the battery regularly to prevent complete discharge. A fully depleted battery may cause permanent damage.
6. Do not use unauthorized third-party chargers.
7. Do not use non-original or third-party batteries, as this may pose safety risks.

8 Riding Operation

Always perform a pre-ride check to ensure safe riding. Before riding, please inspect the following to ensure your safety:

1. Brakes

Make sure the braking system operates smoothly. Ensure that the power is cut off during braking and that the brakes respond promptly to stop the wheels.

2. Display Screen

Verify that the screen displays correctly, no warning lights are on, and check the remaining battery level.

3.Tires

Ensure the wheels rotate smoothly and that the tire pressure is within the recommended range.

4.Component Connections

Carefully inspect the motorcycle for cracks, damage, or loose parts. Repair or replace any issues before riding.

9 Specifications

S3 Parameter Table		
Items	Type	Parameter
Size	Unfolded (Length*Width*Height)	1530*710*910mm
	Package Size(Length*Width*Height)	1320*340*665mm
Weight	Net Weight	53kg
	Gross Weight	61kg
User	Load	120kg
	Recommended Age	12+
Performance	Max Speed	70km/h
	Max range	60-70km
	Max Climbing angle	35°
	Operating Temperature	40°C
	IP Rating	IPX4

S3 Parameter Table		
Items	Type	Parameter
Battery	Voltage	60v
	Max.Charging Voltage	67.4v
	Capacity	23.4Ah
Motor	Peak power	5kw
	Input Voltage	60v
Charger	Output Voltage	67.4v
	Output Current	2A
	Charging Time	12h

10 Warranty

The motorcycle is covered by a one-year warranty from the date of purchase. The warranty does not cover the following situations:

1. Consumable and wear-prone parts, such as tires, brakes, and plastic components.
2. Damage caused by improper use or failure to follow the user manual.
3. Damage resulting from accidents, scratches, or exposure to corrosive substances.

4. Damage caused by unauthorized use of third-party accessories or modifications.
